...

Section 2 Add: 2.7 IGE/UP/1 Edition 2 adopts the concept of "gauge readable movement (GRM)". When using a water gauge, it may be possible to reduce the duration of tests for new installations and extensions by adopting the concept of "no perceptible movement". This will lower test times in many cases but has to be subject to a

P27 use strength testing procedures - IGE/UP/1A to confirm the integrity of the newly installed gas system P28 if the installation fails the strength test either; 1) trace and repair the escape and retest, or 2) isolate unsafe gas system and components and apply the gas industry unsafe situations procedure

Strength testing, gas tightness testing and direct purging ...

IGEM UP/2 has been bought in-line with BS EN 15001, BS EN 1775 and IGEM UP/16, to create a more universal standard for installers. UP/2 now covers bio-gases and pressures up to 60bar, with more information on pipe sizing, a wider range of materials covered, detailed requirements for weld quality and easier to understand drawings.
