Implant overdentures are an excellent treatment option for the edentulous patient This type of prosthesis is indicated when patient demands cannot be met either through a fixed implant prosthesis or through a complete denture Retention is obtained through use of attachments placed directly on implants or on bar superstructures.

## **Implant overdentures, introduction | FOR.org**

Abstract. Microstomia may result from surgical treatment of orofacial neoplasms, cleft lips, maxillofacial trauma, burns, radiotherapy or scleroderma. A maximal oral opening that is smaller than the size of a complete denture can make prosthetic treatment challenging. This clinical report presents the prosthodontic management of a total edentulous patient with microstomia.
