Watch Keeping in Engine Room: Image Credit: www.jamstec.go.jp A. Handing over a watch: Engineers on ships perform their duties in rotational shifts, each having fixed and equal number of hours. This work shift, also known as a watch, needs to be carried out in an efficient manner to ensure the safety of life and property at sea. The normal watch

CoC Oral Exam Preparation (Part - 19): Engine Room Watch ...

On a ship, the engine room(ER) is the compartment where the machinery for marine propulsion is located. To increase a vessel's safety and chances of surviving damage, the machinery necessary for the ship's operation may be segregated into various spaces. The engine room is generally the largest physical compartment of the machinery space.

Engine room - Wikipedia

Engineers on ships perform their duties in rotational shifts, each having fixed and equal number of hours. This work shift, also known as a watch, needs to be carried out in an efficient manner to ensure the safety of life and property at sea. The normal watch keeping schedule and responsible watch keeping engineers in a fully manned engine room:
