Quality Infrastructure. In a modern world with rapidly growing international trade, countries compete less based on the availability of natural resources, geographical advantages and lower cost of labor, and more on the factors related to the ability of firms to access and compete in new markets. One of these factors is the ability to demonstrate quality and safety of goods and services and to comply with international standards in target markets.

Quality Infrastructure - World Bank

A national quality infrastructure is essential in breaking down technical barriers to trade. It is thus the key to the greater integration of the partner countries into the international trading system.
