### Time Management for System Administrators: Stop Working ...

Time is a precious commodity, especially if you're a system administrator. No other job pulls people in so many directions at once. Users interrupt you constantly with requests, preventing you from getting anything done. Your managers want you to get long-term projects done but flood you with requests for quick-fixes that prevent you from ever getting to those long-term projects.

### Time Management for System Administrators: Stop Working ...

The system administrator has two basic tools for managing time: to-do lists and calendars. There is no particular form or medium that this must take. Electronic services can be handy, but paper has some compelling features itself. Whatever the method of keeping the list and calendar, organization is the key.
